SHORT GUIDE TO GETTING ONLINE IN CHICHESTER DISTRICT

Computers and the internet have become a part of everyday life – from staying in touch with friends and family and sharing

photographs to booking appointments, managing your money, applying for a job, accessing healthcare resources and online shopping. It's all really useful... if you know how and have access to equipment and Wi-Fi!

The Coronavirus pandemic has highlighted that many, many people are not able to access online resources and services – some people don't have the right equipment at home, some people don't have home internet, others have everything they need, but really don't feel confident or comfortable in using their device or surfing the net.

This short guide contains some information about possible sources of assistance getting equipment, getting connected and getting the skills needed
